Customers say

Customers like the performance, pain relief, value, and shape of the body positioner. They mention that it works well, it holds up well, and that it's contoured for the task at hand. Some are also satisfied with firmness, and pressure relief. That said, opinions are mixed on comfort, and fit.

★★★★★ Absolutely great cushion!

Reviewed in the United States on October 20, 2015

Verified Purchase

I absolutely love this cushion! It has helped me immensely and I can't say enough good about it. I've had it for a couple of months. At first it was a little unusual to get used to when using it in the car and sometimes I still have to adjust myself to fit into the leg indents properly - but it is so worth it! Sometimes, I even forget that I'm sitting on it. It has eased the points of pressure that I was having problems with. I have a crooked tailbone among other issues. First I ordered the other tailbone cushion from Ayllo with the cutout - but, even though it was a great cushion I realized that it just wasn't quite right for me and that I would do better with a donut hole (for the other issue). I hadn't seen this other one before, but when I went online to return my original purchase, I found this one with the donut hole. I did have to pay some shipping to send the other one back, but it was worth it to get this one. I get a lot of back pain sitting at my computer and also in the car. This has helped that pain a lot and improved my condition quite a bit. It is a little pricey for a cushion, but I'm planning on buying another one to keep in my car. The only thing I can complain about is the fact that, though I would love to take it everywhere with me, it's an odd looking cushion and people ask questions that I find a little too personal to answer. I'm planning on sewing a cover for it with some material that stretches so I can fully take the benefit of the cushion.
